I've been working for a film production startup for the past 2 years. I'm a web developer and marketing writer. The content I've setup has received over 5 million online views. I'm seeking a position where I can work with code all day long!

Web Developer <http://www.wyomafilms.com> **2011 – Present**
I created the Wyoma Films website and have maintained it for 2 years. I've gone through a handful of re-designs and iterations on the site, which currently is built with Django and PostgreSQL on the backend. I use Bootstrap, jQuery and responsive design on the frontend.

I created a Kickstarter for Wyoma Films that successfully raised \$10,731 to produce Mike Garcia and the Cruz. I did the Kickstarter layout and write-ups. In 2011, I wrote a business proposal and outline for a commercial which I sold to Sun-Maid Growers of California for a production contract.

System Administrator **January 2013**
I installed and upgraded 2 workstations for the optometrist offices of Dr. Irwin Dudow and Dr. Lydia Tan. I had to dual boot their new Windows 8 workstations with Windows 7 in order for them to continue to use Office Mate 10, which is currently Windows 8 incompatible.

Technical Editor **2005 – 2006**
I edited the help manual for the irrigation software, *Storm*, created by Central Valley Software Solutions.

Education **2005 – 2010**
Received a Bachelor of Arts with a major in English from Oberlin College in 2010. I spent a lot of my time volunteering with non-profit organizations. I spent a semester volunteering with Ohio Citizen Action, an environmental activist group in Cincinnati, OH. I spent a winter semester volunteering with the Fresno Rescue Mission in Fresno, CA. I tutored students in college level English and Computer Science courses while attending Oberlin College.

2000 – 2004
Graduated from Selma High School in 2004 with a 4.02 GPA. I received both the English and Math 2004 Student of the Year awards for my class. I was layout editor for my high school paper, The Clarion, for 3 years. My senior year I redesigned the layout for my school paper and won Best Layout Design at the 2004 Scholastic Press Association competition held at Fresno State University. I was a math tutor during my junior and senior year in high school for Pre-Calc and AP Calculus.

Technical Skills
Please view some of my coding samples online at: github.com/iepathos/codingsamples

Backend
Python, Django, Flask, Fabric, MySQL, PostgreSQL,
Git, BASH, Apache, Nginx, Ubuntu/Linux, Ruby, Chef, Vagrant

Frontend
HTML5, CSS3, Javascript, jQuery, Bootstrap, AJAX,
Adobe Photoshop, Adobe InDesign, Adobe Illustrator, Gimp
